Attachment(s)

- ☒ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 10-2-06.
- ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- ☐ Notice of Informal Patent Application
- ☐ Other: _____.

The disclosure is objected to because of the following informalities: In claim 3, line 5, “axis”, second occurrence, should be replaced by --axes--. In claim 19, 21, and 22, line 2 of each, “axis” should be replaced by --axes--. Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 6, 9, and 15-22 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Orbay et al., US 6,706,046 B2. Regarding claim 1, Figures 4 and 5 illustrate three threaded transverse bores **50**, **52**, and **74** (column 4, line 33) spaced along the longitudinal shaft axis (as seen from the cross-sectional view of Figure 5) defined by the plate portion **14**. Bores **50** and **52** each extend at a non-perpendicular proximal-distal angle to the longitudinal axis of the shaft (column 4, lines 59-67), and bore **74** extends perpendicularly to the longitudinal axis (Figures 4, 5, and 10).

The Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55 (MPEP § 201.15).

Claims 4, 5, 7, 8, 10, 11, and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
